

## **Taco Bell franchisee to boost energy efficiency**

Cotti Foods Corp., a Southern California franchisee of Taco Bell, plans to install new energy management systems in more than 50 of its restaurants, including eight in San Bernardino County.

A statement from San Diego-based technology provider Advanced Telemetry said its EcoView systems will allow building owners to remotely monitor, control, and limit access to climate control systems to ensure facilities are kept comfortable and use energy efficiently.

The Inland restaurants getting the systems are in Apple Valley, Barstow, Hesperia, Rialto and Victorville.
