

GEAR & GADGETS

Hook the Wheelmate Steering Wheel Desk to your car steering wheel, and you've got an instant tray for dining, working on your laptop computer or writing (not while you are driving, of course). The sturdy vinyl laminate tray provides a 15-by-6-inch working surface that wipes clean easily. Be sure to measure the steering wheel before ordering. The curved end sections of the tray that hook onto the wheel will only fit a wheel that is no thicker than 1¼ inches in diameter. You might have to turn the wheel one way or the other to provide clearance for the curved lip between the "hooks." On my car, the tilt of the steering wheel, even when adjusted, kept the tray from lying completely horizontal, so I avoided using it for liquids. But it made a

great surface for everything else during a break in my road trip.
