

GEAR

Heated mug

First came the cup holder.
Then came the travel mug.
And now the apotheosis for
road-tripping java hounds:
The heated travel mug. Plug it
into your car's lighter, and it
will keep 16 ounces of fair-
traded, shade-grown, Ethiopia
highlands arabica — or, for
that matter, Folgers Crystals —
warm from here to the Grand
Canyon and back. Made of
stainless steel, it also keeps
your beverages piping hot
during YouTube marathons at
home or at Internet cafes by
plugging into your computer's
USB port. Perfect for the slow-
sipping road tripper.

Details: Up to \$39.36 exclu-
sively from cableorganizer-
.com.
